

Recognized by Frost & Sullivan with the

2022 ENABLING TECHNOLOGY LEADERSHIP AWARD

in the global managed detection
and response industry

Expel Workbench augments every aspect of MDR and helps Expel deliver world-class security services to its customers.

Expel's platform reduces the workload on security vendors and service providers, allowing them to effectively engage the threats.

Enabling Technology Leadership Award

recognizes the company that applies its technology in new ways to improve existing products and services and elevate the customer experience.

Expel excels in the following criteria in the managed detection and response industry:

**Commercialization
Success**

**Application
Diversity**

**Commitment to
Creativity**

**Customer Service
Experience**
